

Time To Travel

an assistant to your journey

PRESENTED BY 3T TEAM

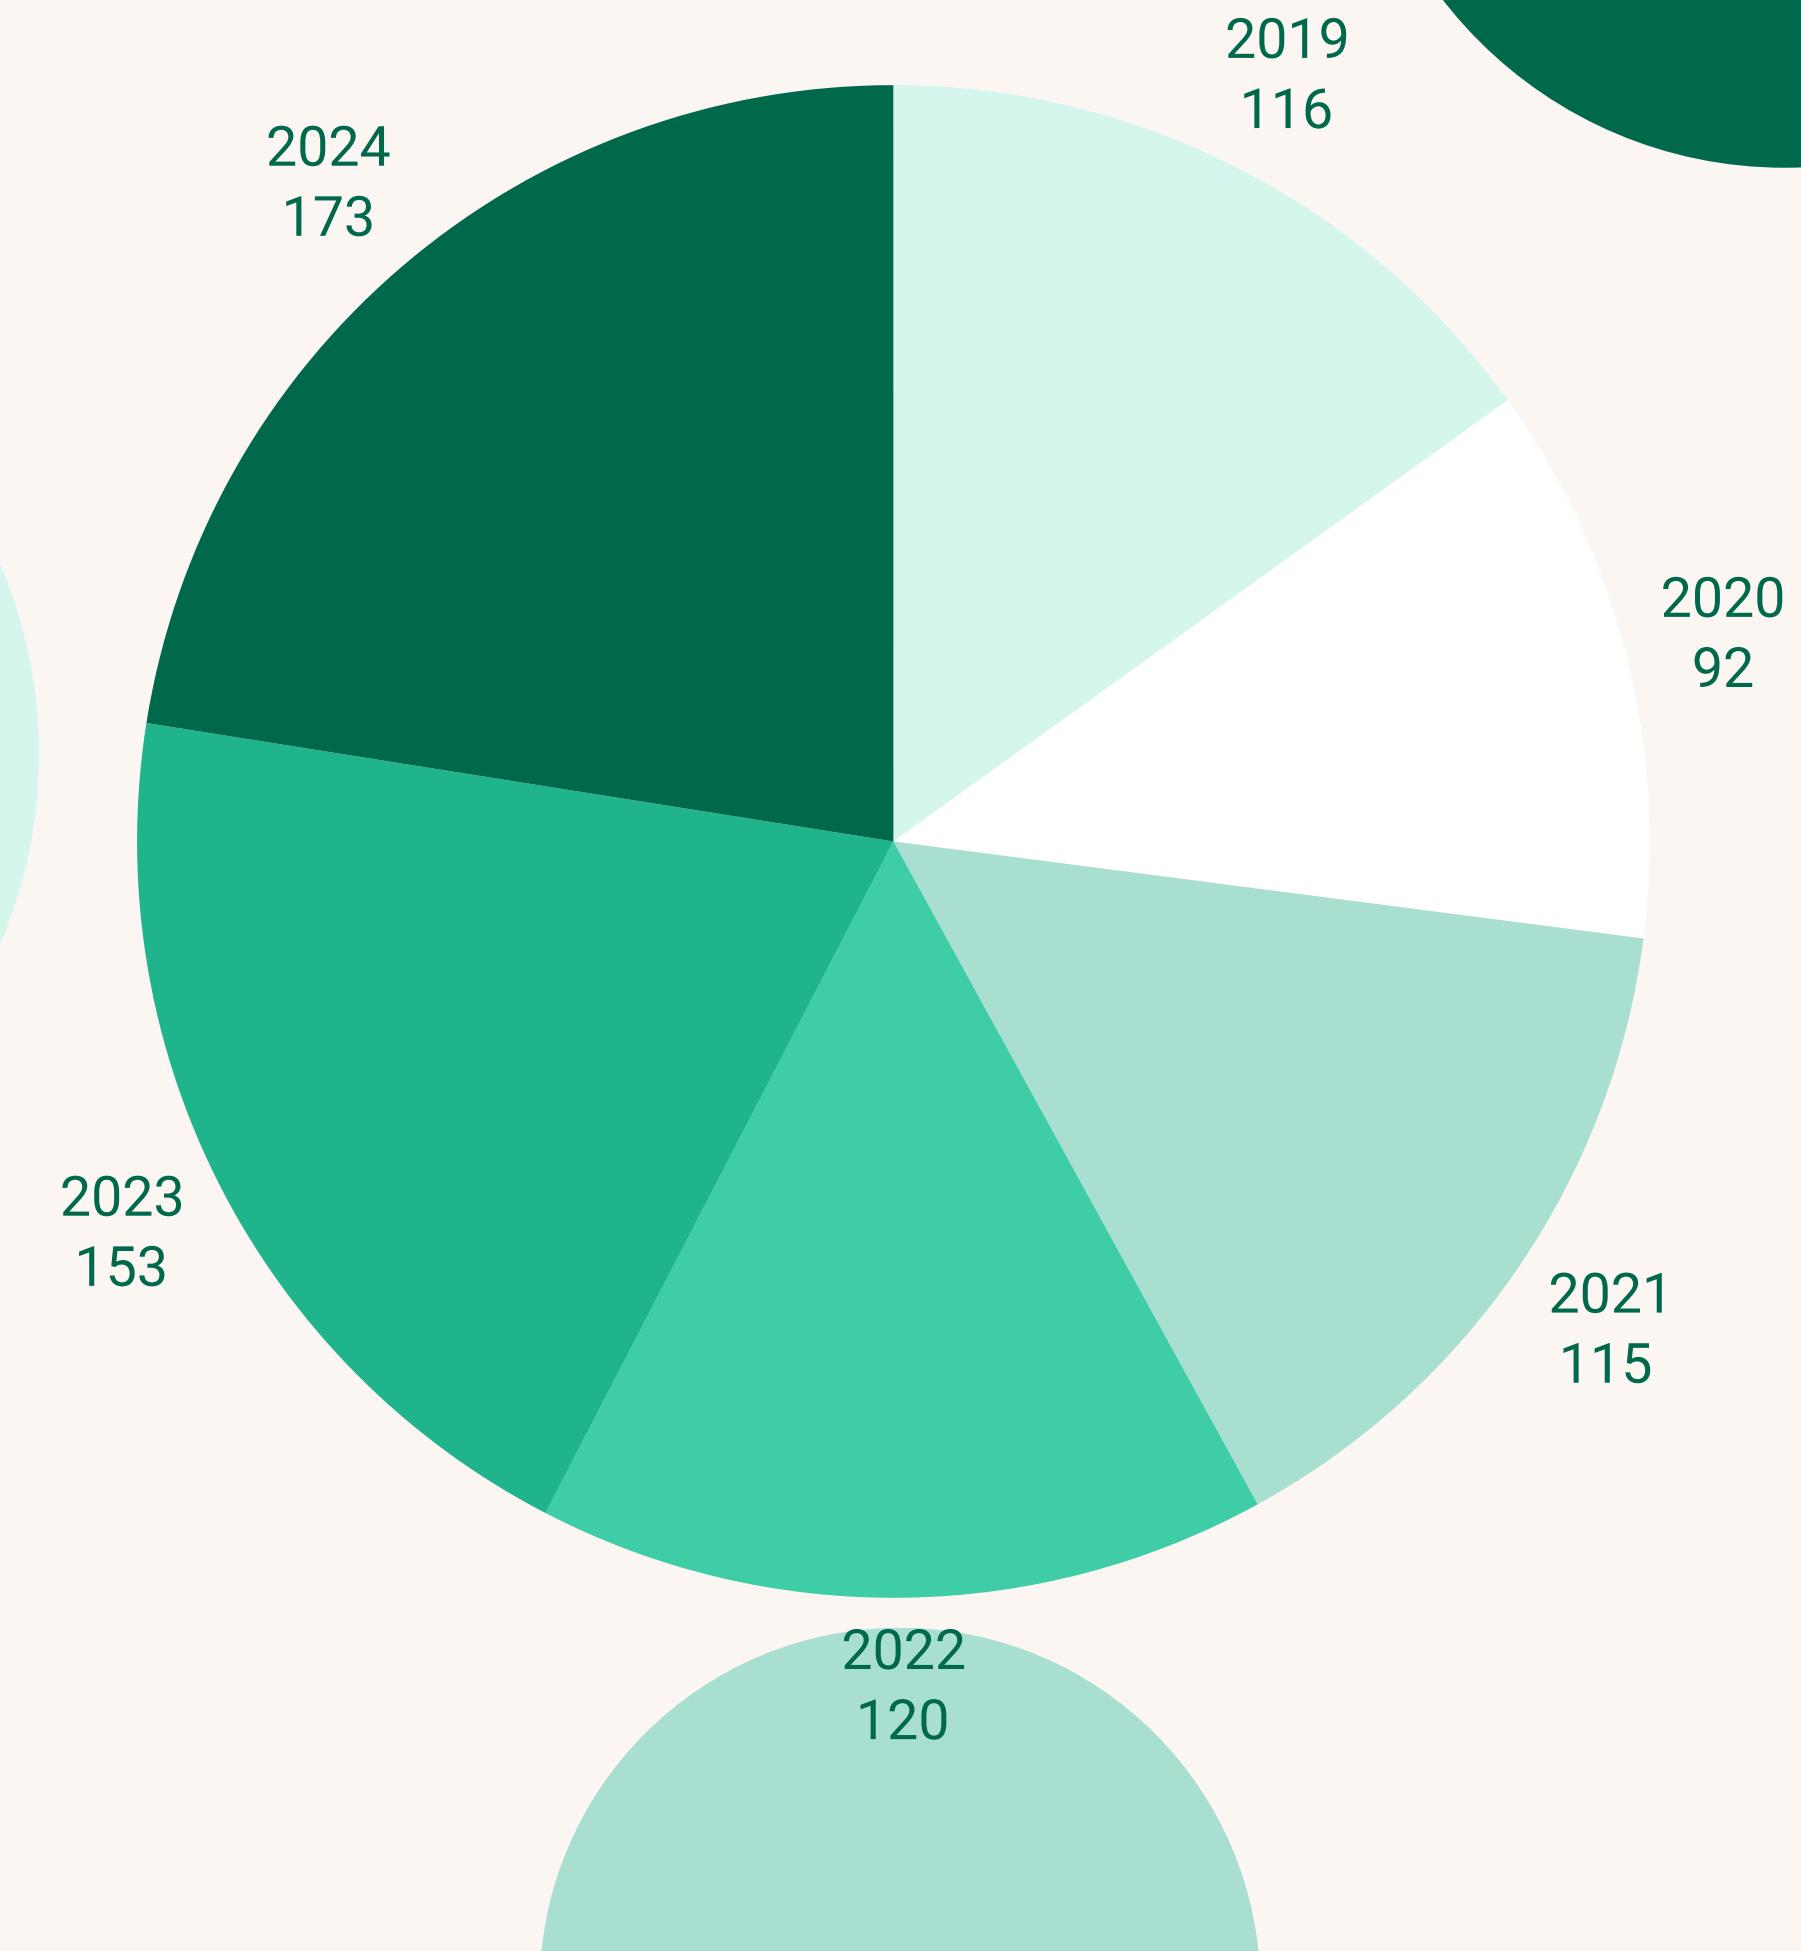

THE AUDIENCE

and field of our project

Our target audience: tourists, first from Russia and then perhaps the whole world

Our project is focused on a very popular worldwide field - the tourism sector

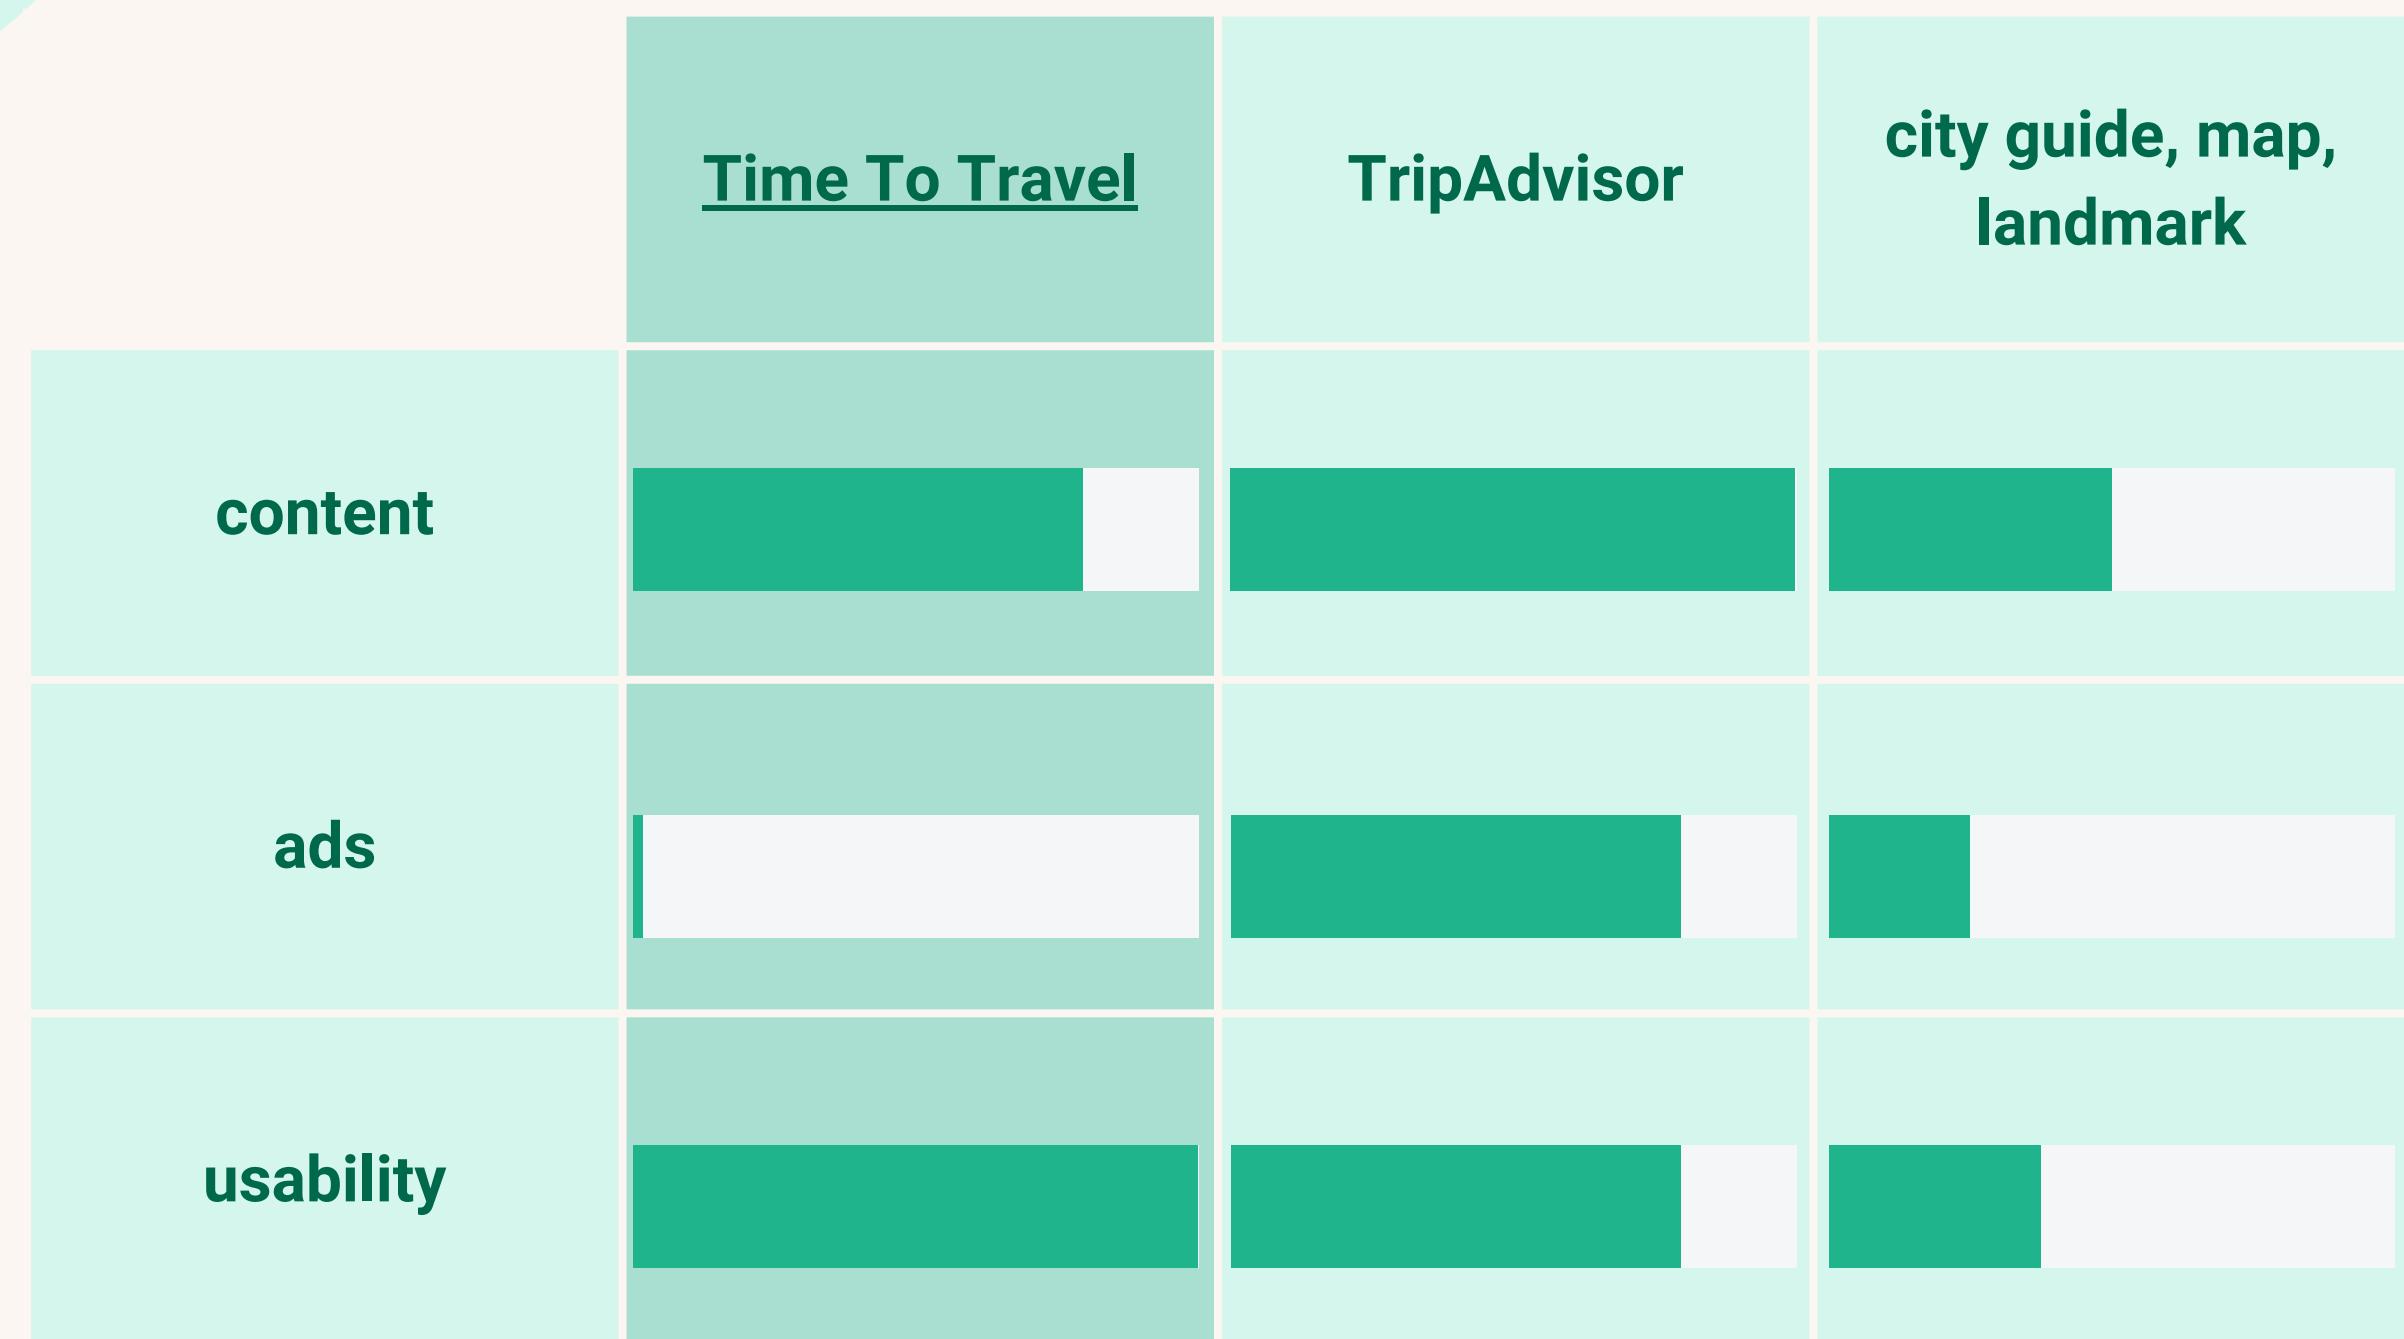

THE PROBLEM

is unstructured information

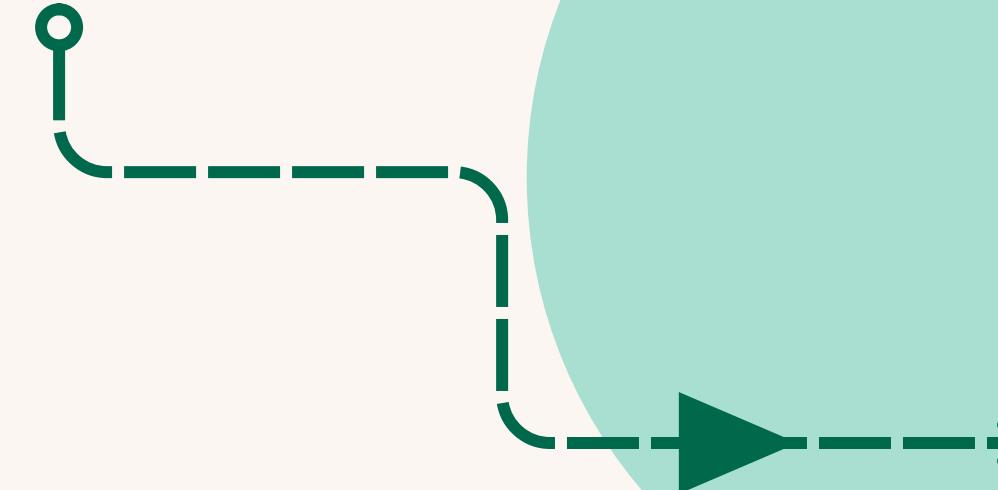

The collage illustrates the concept of unstructured information through three different digital platforms:

- Top right:** A screenshot of the Russian Wikipedia page for "Университет Иннополис". The page features a large banner image of the university's modern building, navigation menus, and a sidebar with detailed organizational information.
- Middle right:** A screenshot of the official website for Innopolis University. It includes a header with the university's logo and navigation links, a main content area with text and images, and a sidebar containing a map and contact details.
- Bottom left:** A screenshot of the Yandex Maps page for Innopolis University. It shows a map of the university's campus with building outlines and street names, along with a sidebar providing basic location details and contact information.

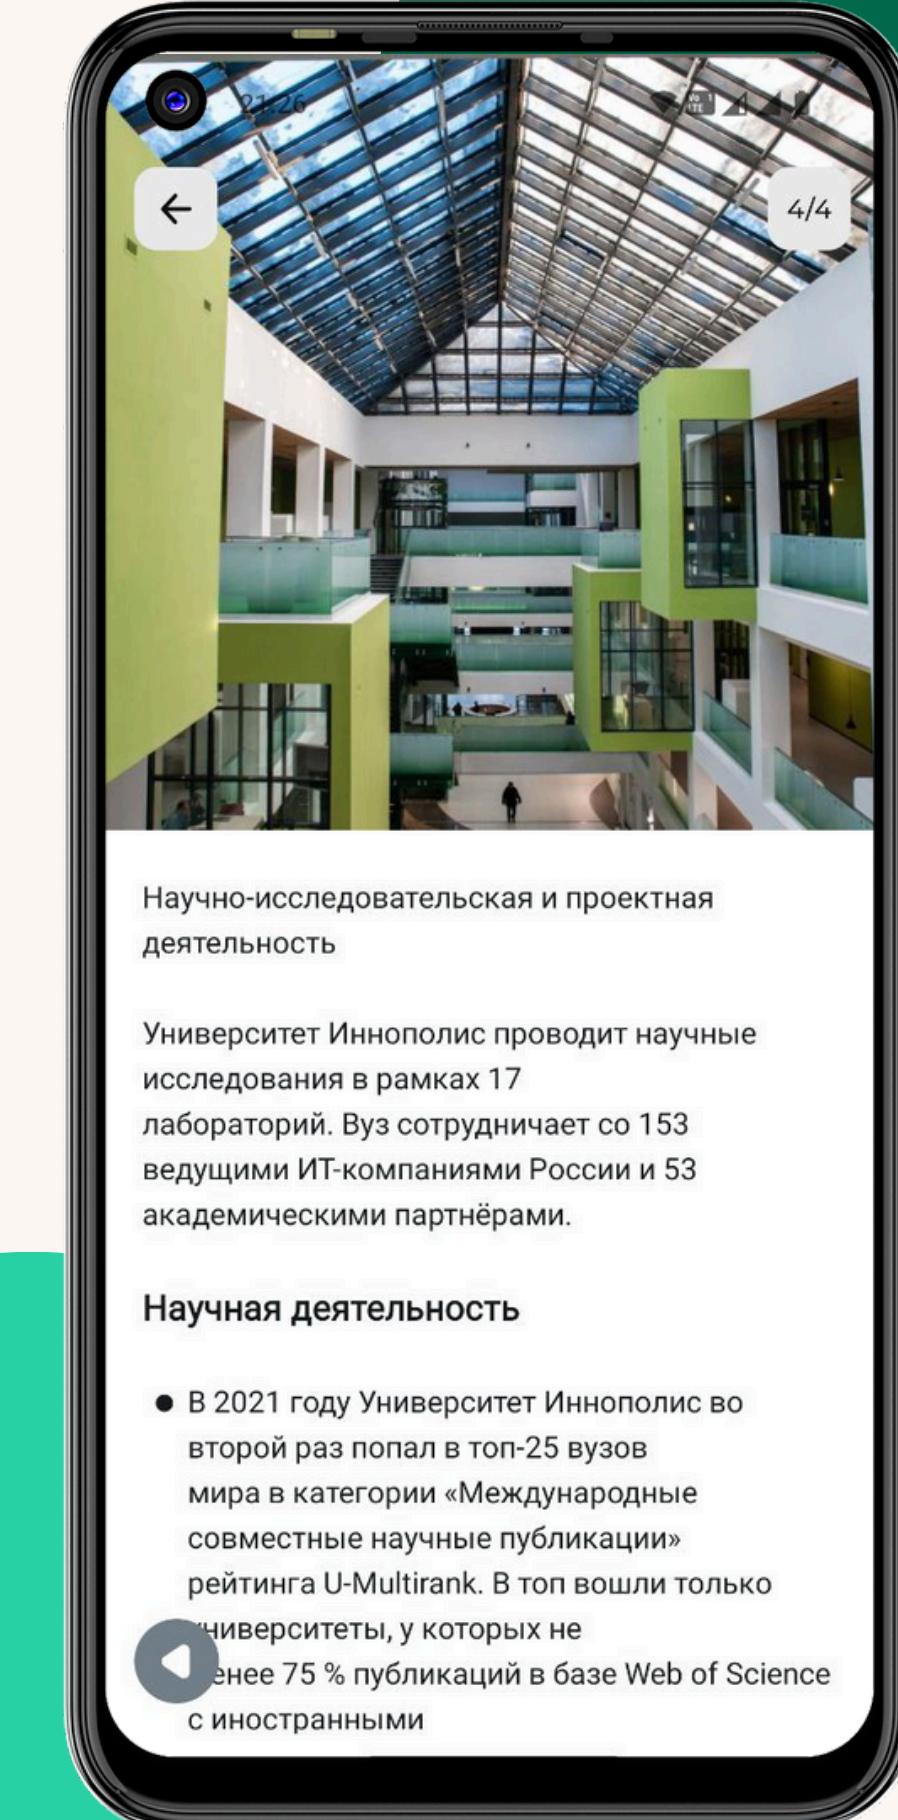

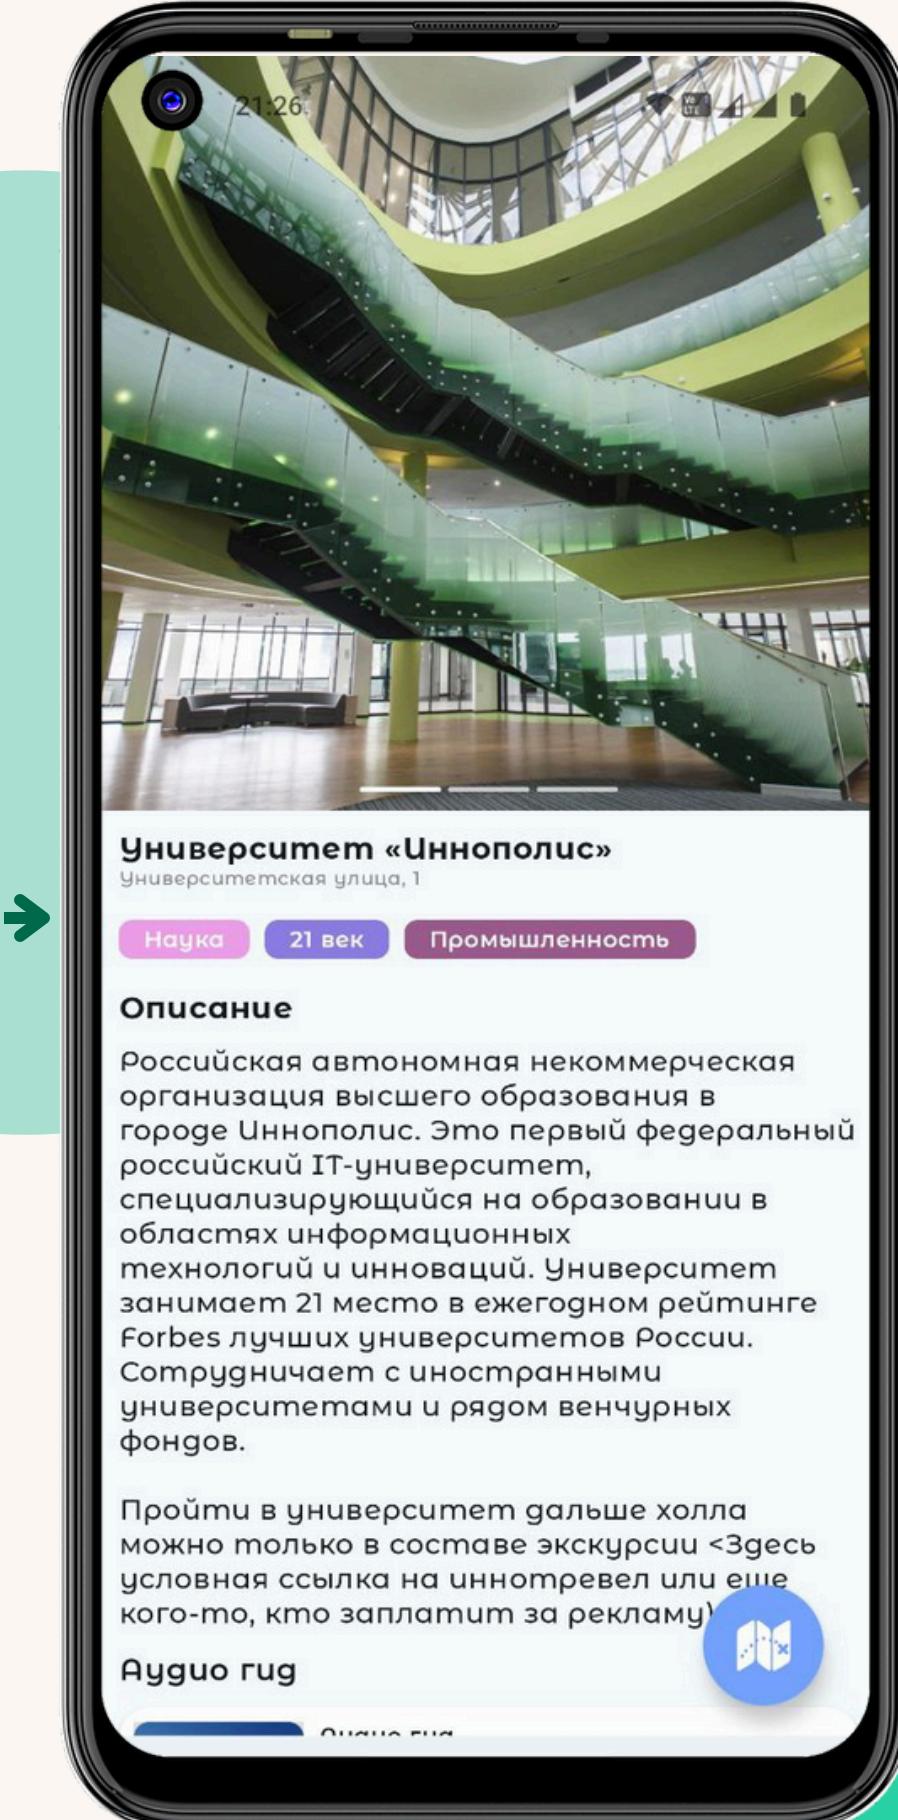

WHY ARE WE BETTER

SOLUTION

Just a couple of clicks and all the information the client needs will be shown

WHAT'S NEXT

add:

- variability to the audio guide
- rank system
- achievements
- reviews
- push notifications

expand:

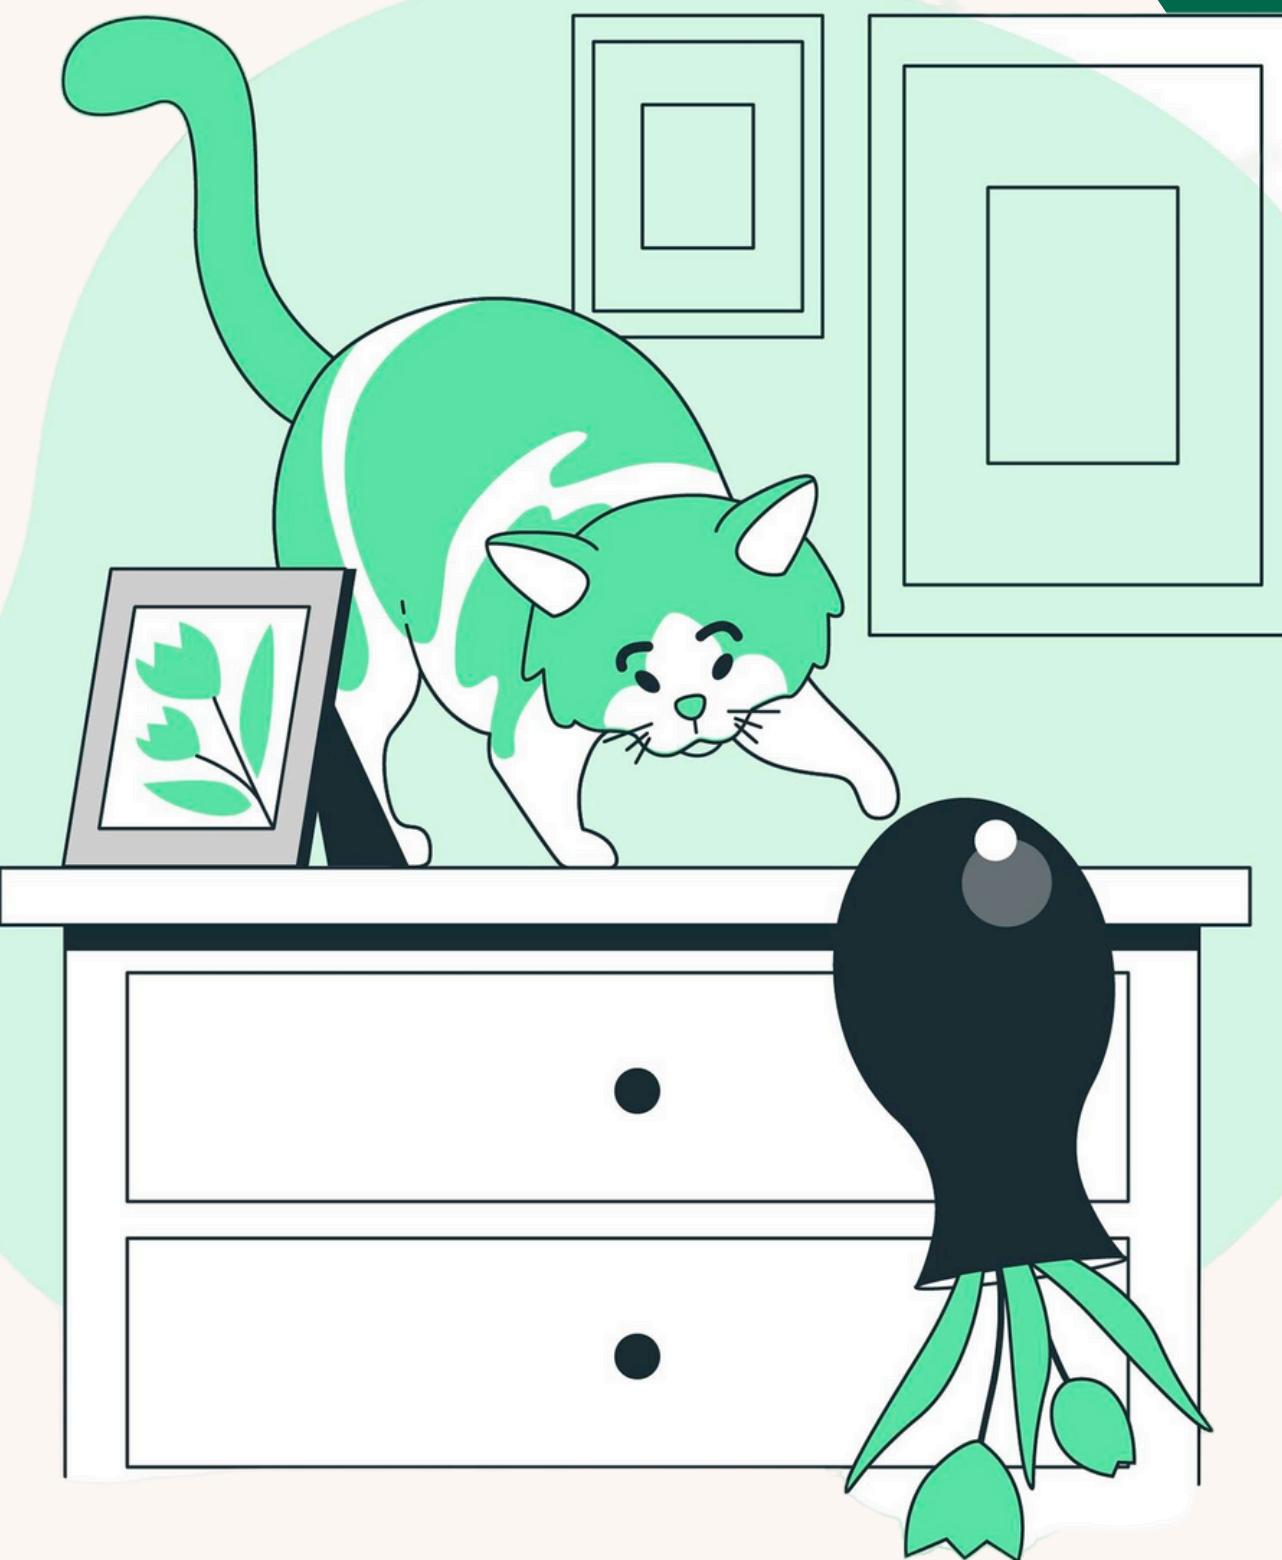

- the application to other regions:
Kazan, St. Petersburg, Moscow

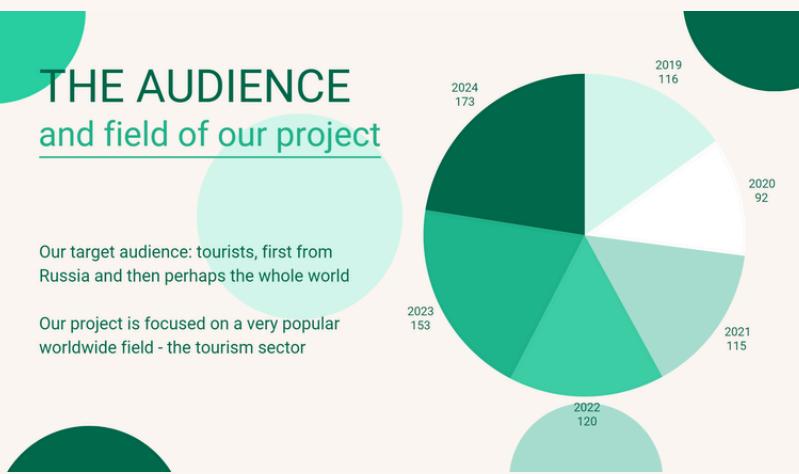

CONCLUSION

or catclusion...

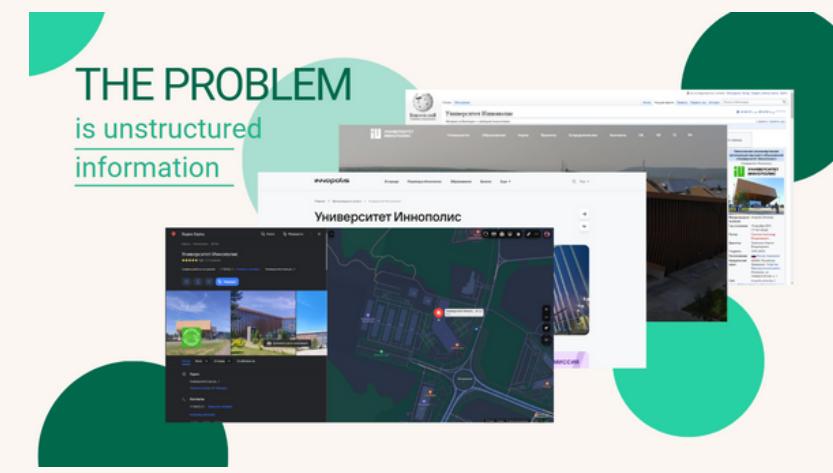

The project manager said
that there were no difficulties,
so we inserted a cat here

QUESTIONS

2. The Audience

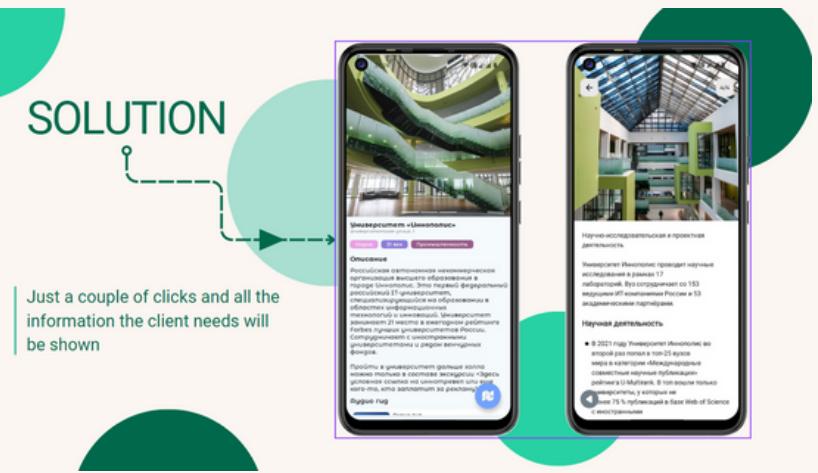

3. The Problem

WHY ARE WE BETTER

	Time To Travel	TripAdvisor	city guide, map, landmark
content	Medium	High	Medium
ads	Low	Medium	Medium
usability	High	Medium	Medium
